

Bar To Bar Explanation

How the piece works:

This piece is for solo onstage soprano saxophonist, screen projection (of a webpage) with stereo audio, and audience participation with cellphones. The performer controls the flow of the piece using a combination of a webpage score and a webpage on their cellphone. The audience accesses their part through a QR code that the performer triggers to display during the piece.

NOTES:

Here are screenshots of the score pages that the performer sees on their webpage:

Reset

To start the piece, press "1. Play Starting Message" on your iPad. Once the message plays, walk out and bow, placing iPad on music stand. (This will also start the background audio)

1. Play Starting Message

After you've bowed, start playing these fragments in any order, repeating freely. You can choose whether to add spaces between or play them continuously. Spaces do not have to be in time.

(transposed)

$\text{♩} = \text{ca. } 100$

Soprano Saxophone

After a few seconds, press "Show QR Code", then keep playing fragments

2. Show QR code

After a (loose) couple of minutes, walk to the front with your cellphone. Make sure noaApp.html is loaded. Say "Cheers!" and hold your phone up to the audience, taking a drink. As you lower your phone, press the "Renaissance" button on it.

Reset

Wait for lyre melody to play in background. Audience members will be trying out their virtual instruments. After a few seconds, press the 'Start Voices Playback' to start a measure count-in to the prerecorded voices, then play your part:

Start Voices Playback

La morisque

(transposing)
♩ = 180

10
21
30

After you finish, press the 'Audience Drinks' button to change the audience cellphones back to drinks

Audience Drinks

After a few seconds of audience members drinking, go to the front again and 'Cheers' the audience. On the cellphone app, press the 'Bones' button to transition to the next scene.

Reset

After returning, start playing the following, changing as audience do. Their sounds are on a timer that starts when the 'bones' section does

Audience members will play similar pre-recorded sounds on their cellphones. Their cellphones will move through the five sounds listed below, in order. Move through the sections as they do, using the notation as a guideline. Rhythms/pitches/dynamics give an idea of the sounds, but feel free to explore beyond the boundaries of the score.

1. Play slaps in chromatic ascending/descending motion, duration/number of notes/rhythms/direction can vary, can break the chromatic pattern at will and play slaps freely in a 'popcorn' like manner

2. Play in any order, for varying duration, and repeat at will. Feel free to adjust dynamics if easier. If there are any you'd rather omit, that's fine!

3. sing and play similar pitch at same time, any pitch roughly within this range. Duration can vary, intonation of sung and played pitch do not have to be accurate

4. play with tenor mouthpiece, using hand to bend pitch at will. Alternate between longer pitch bending and shorter bursts at random.

5. Play slaps in chromatic ascending/descending motion, vary duration/number of notes/rhythms/direction can vary, can break the chromatic pattern at will and play slaps freely

Soprano Saxophone

13 35 37 42 60 78 etc....

After a (loose) couple of minutes, walk to the front again and 'Cheers' the audience for a final time. Press the 'Return to Hotel' button on your phone. A recorded message will play, telling the audience 'That's it for the entertainment folks, have a wonderful evening!' After it plays, bow and exit stage.
